Regarding claim 44, the closest prior art of record are: Metso et al. (US 5,920,826) in view of Kamada et al. (US 6,192,258). Metso and Kamada, once combined, teach the limitations of claims 23, 45, 48-50 as indicated in office action dated 04/01/08, but fail to teach a mobile phone comprising: a user interface including at least one key; a memory; and a processor coupled to the memory and programmed with computer-executable instructions configured to: display on the user interface a list of contacts stored in the memory of the mobile phone, each of the contacts in the list of contacts having at least one e-mail address field for storing an associated e-mail address and at least one telephone number field for storing an associated phone number; receive a contact selected from the list of contacts; receive a key activation for the selected contact; if the activated selected contact includes at least one associated e-mail address in the e-mail address field and at least one telephone number in the telephone number field, display contact details upon the key activation; if the activated selected contact includes at least one associated e-mail address in the e-mail address field and does not include a telephone number in the telephone number field, display a screen for composing an e-mail upon the key activation, the selected at least one e-mail address
